

Buckeye Fire Station

## Custom Finishes

RMP Metal Products can simplify your specification process. In addition to our standard single skin roof and wall panel systems, we are able to create custom fabrications and match finishes to combine with our Alumaboard™ and Alumakor™ product lines, to create unique cladding solutions. We are a single source supplier for metal cladding, from individual components to complete systems.

Center City Bus Station, Las Vegas

## Perforated Metal

Our products offer quality, reliability, and an endless combination of colors, textures, and shapes. For new construction or revitalizing existing structures, RMP metal cladding systems provide both function and aesthetic to enhance any building project.
